

DH-4-B DOUBLE-HEAD MIXER

Excavator Mounted In-Situ Hydraulic Soil Mixing Attachment

Counter Rotating “Blender” Drums for Maximum Mixing Energy

For Soil Remediation or Stabilization Applications

Optional Wet or Dry Injection System

Mixing Principle

BASIC SPECIFICATIONS

Max. Input Power Per Drum	190 hp	140 kW
Rotation (Bi-Directional)	0 – 110 rpm	0 – 110 ⁻¹
	75 rpm at 120 gpm per drum	75 rpm at 450 L/m per drum
Shaft Torque @ 350 bar / 5075 psi	24,700 ft lbs.	33.5 kNm
Max. Pressure	6527 psi	450 bar
No. Mixing Blades	28 per drum	
Diameter (per drum)	48"	1219 mm
Weight with 6' (2 m) Extension Bracket	13,200 lbs	6,000 kg

* Multiple Motor Power and Displacement Options to Match Carrier's Hydraulic Capacity Specifications subject to change without prior notice
